

➤ **Writing Your First Application**

➤ **Before you begin**

➤ **Set up the blockchain network**

➤ **Launch the network**

➤ **Sample application**

➤ **First, the application enrolls the admin user**

➤ **Second, the application registers and enrolls an application user**

➤ **Third, the sample application prepares a connection to the channel and smart contract**

➤ **Fourth, the application initializes the ledger with some sample data**

➤ **Fifth, the application invokes each of the chaincode functions**

➤ **A closer look**

➤ **Updating the ledger**

➤ **The asset-transfer ('basic') smart contract**

➤ **Clean up**

➤ **Summary**
