

Hyperledger LEVEL 10

1. Policies
 - What is a policy
 - Why are policies needed
2. How are policies implemented throughout Fabric
3. System channel configuration
4. Application channel configuration
5. Access control lists (ACLs)
6. Smart contract endorsement policies
7. Modification policies
8. The Fabric policy domains
9. How do you write a policy in Fabric
10. Signature policies
11. Implicit Meta policies
12. An example: channel configuration policy
13. Fabric chaincode lifecycle
14. Chaincode endorsement policies
15. Overriding policy definitions
