

- **Networking and Interprocess Communication**
- **asyncio — Asynchronous I/O**
- **socket — Low-level networking interface**
- **ssl — TLS/SSL wrapper for socket objects**
- **select — Waiting for I/O completion**
- **selectors — High-level I/O multiplexing**
- **asyncore — Asynchronous socket handler**
- **asynchat — Asynchronous socket command/response handler**
- **signal — Set handlers for asynchronous events**
- **mmap — Memory-mapped file support**
