

Theano LEVEL 21

1. Extending Theano with a C Op
2. Python C-API
3. Reference counting
4. NumPy C-API
5. NumPy data types
6. NumPy ndarrays
7. Accessing NumPy ndarrays' data and properties
8. Creating NumPy ndarrays
9. Methods the C Op needs to define
10. Important restrictions when implementing a COp
11. Simple COp example
12. Alternate way of defining C Ops
13. Main function
14. Using GDB to debug COp's C code
