

Hyperledger LEVEL 13

1. The Ordering Service • What is ordering?
2. Orderer nodes and channel configuration
3. Orderer nodes and identity
4. Orderers and the transaction flow
5. Phase one: Proposal
6. Phase two: Ordering and packaging transactions into blocks
7. Phase three: Validation and commit
8. Ordering service implementations
9. Raft
10. Raft concepts
11. Raft in a transaction flow
12. Architectural notes
13. How leader election works in Raft
14. Snapshots
15. Kafka (deprecated in v2.x)
