

TEKLRN

KUBERNETES LEVEL 39

1. Logging Architecture
2. Basic logging in Kubernetes
 - Logging at the node level
 - System component logs
 - Cluster-level logging architectures
3. Using a sidecar container with the logging agent
4. Streaming sidecar container
5. Exposing logs directly from the application
- 6.
7. Metrics For Kubernetes System Components
 - Metrics in Kubernetes
 - Metric lifecycle
 - Show Hidden Metrics
 - Disable accelerator metrics
 - Component metrics
 - kube-controller-manager metrics
8. System Logs
 - Klog
9. Structured Logging
10. JSON log format
11. Log verbosity level
12. Log location
