

TEKLRN

KUBERNETES LEVEL 23

1. Network Policies
 - Prerequisites
2. Isolated and Non-isolated Pods
3. The NetworkPolicy resource
4. Mandatory Fields
 - Spec
 - podSelector
 - policyTypes
 - ingress
 - egress
5. Behavior of to and from selectors
6. Default policies
 - Default deny all ingress traffic
 - Default deny all ingress traffic
 - Default deny all egress traffic
 - Default allow all egress traffic
 - Default deny all ingress and all egress traffic
7. SCTP support
8. What you CAN'T do with network policy's (at least, not yet)
9. Adding entries to Pod /etc/hosts with HostAliases
 - Default hosts file content
 - Adding additional entries with hostAliases
10. Why does the kubelet manage the hosts file?
11. IPv4/IPv6 dual-stack
 - Supported Features
 - Prerequisites
 - Enable IPv4/IPv6 dual-stack
12. Services
13. Egress Traffic
 - Known Issues
