

TEKLRN

C# LEVEL 46

1. Namespaces
 - Namespaces overview
 - Using namespaces
 - Accessing namespaces
2. Namespace aliases
3. Using namespaces to control scope
4. Fully qualified names
5. How to use the My namespace
6. Add a reference
7.
 - Add a reference to the Visual Basic library
 - Example
 - Unsafe code and pointers
8. Unsafe code overview
9. Fixed Size Buffers
10. Pointer types
11. Pointer Conversions
12. Implicit pointer conversions
13. Explicit pointer conversions
 - Example
14. How to use pointers to copy an array of bytes
