

The Microsoft Cognitive Toolkit LEVEL 16

1. Serialization
2. Saving and loading models
3. Save model
4. Load model
5. Evaluate a saved trained model
6. Access the parameters of a saved trained model
7. Evaluate and write out specific layers of a saved trained model
8. ONNX format
9. Checkpointing during training
 - Low-level checkpointing (Trainer.train_minibatch)
 - High-level checkpointing (Function.train)
 - Distributed training
