

- **Keras preprocessing layers**
- **Introduction**
- **Available preprocessing layers**
- **Core preprocessing layers**
- **Structured data preprocessing layers**
- **Image preprocessing layers**
- **Image data augmentation layers**
- **Preprocessing data before the model or inside the model**
- **Benefits of doing preprocessing inside the model at inference time**
- **Image data augmentation (on-device) (Example Code)**
- **Encoding string categorical features via one-hot encoding**
- **Encoding integer categorical features via one-hot encoding**
- **Applying the hashing trick to an integer categorical feature**
- **Encoding text as a sequence of token indices**
- **Encoding text as a dense matrix of ngrams with multi-hot encoding**
- **Encoding text as a dense matrix of ngrams with TF-IDF weighting**
