

TEKLRN

KUBERNETES LEVEL 21

1. Connecting Applications with Services
2. The Kubernetes model for connecting containers
3. Exposing pods to the cluster
 - Creating a Service
 - Accessing the Service
4. Environment Variables
5. DNS
6. Securing the Service
 - Exposing the Service
7. EndpointSlices
 - Motivation
 - EndpointSlice resources
8. Address types
 - Topology information
 - Management
 - Ownership
9. EndpointSlice mirroring
10. Distribution of EndpointSlices
11. Duplicate endpoints
