

TEKLRN

KUBERNETES LEVEL 24

1. Volumes
 - Background
 - Types of Volumes
2. awsElasticBlockStore
 - Creating an EBS volume
 - AWS EBS Example configuration
3. CSI Migration
 - CSI Migration Complete
 - azureDisk
4. CSI Migration
 - cephfs
5. cinder
 - Cinder Volume Example configuration
6. CSI Migration
 - configMap
7. downwardAPI
 - emptyDir
 - Example Pod
8. fc (fibre channel)
9. flocker
10. gcePersistentDisk
 - Creating a PD
 - Regional Persistent Disks
 - Manually provisioning a Regional PD PersistentVolume
11. CSI Migration
 - gitRepo (deprecated)
12. glusterfs
 - hostPath
 - Example Pod FileOrCreate
13. iscsi

14. local
15. nfs
16. persistentVolumeClaim
 - projected
17. Example Pod with a secret, a downward API, and a configmap.
18. Example Pod with multiple secrets with a non-default permission mode set.
19. portworxVolume
20. quobyte
21. rbd
22. scaleIO
23. secret
24. storageOS
25. vsphereVolume
26. Creating a VMDK volume
27. vSphere VMDK Example configuration
28. CSI Migration Complete
 - Using subPath
 - Using subPath with expanded environment variables
29. Resources
30. Out-of-Tree Volume Plugins
31. CSI
32. CSI raw block volume support
33. Migrating to CSI drivers from in-tree plugins
34. FlexVolume
35. Mount propagation
36. Configuration
