1. **Overfit and underfit**
   - **Setup**
2. **The Higgs Dataset**
3. **Demonstrate overfitting**
4. **Training procedure**
5. **Plot the training and validation losses**
6. **View in TensorBoard**
7. **Strategies to prevent overfitting**
8. **Add weight regularization**
9. **Combined L2 + dropout**
10. **Save and load models**
11. **Installs and imports**
    - **Install and import TensorFlow and dependencies:**
    - **Get an example dataset**
    - **Define a model**
12. **Start by building a simple sequential model:**
13. **Save checkpoints during training**
14. **Checkpoint callback usage** 15. **Checkpoint callback options**
16. **What are these files?**
17. **Manually save weights**
18. **Save the entire model**
19. **SavedModel format**
20. **HDF5 format**
21. **Saving custom objects**
