TEKLRN

HADOOP LEVEL 20

1. Data collection with Fume
   - Versioning

2. Installing and Configuring Fume

3. Capturing Network Traffic to a Log file

4. Writing Network Data to Log files

5. Logs Vs Files

6. Source, Sinks and Channels

7. Understanding Fluke Configuration Files

8. Writing Network Traffic into HDFS

   - Adding timestamps

9. Multi Level Flume Networks
10. Writing to multiple Sinks
11. Data Life Cycle, Staging Data and Scheduling

12. Getting Data out of Hadoop

   - Writing Data from within the reducer
   - Writing SQL Importer files from the reducer

13. Importing data from Hadoop into MySQL
14. Differencer between Sqoop imports and Exports
    - Insert Versus Updates
    - Sqoop and Hive exports
15. Importing Hive Data in to MySql
16. Considering RDS
