TEKLRN

KERAS LEVEL 3

1. Keras Layers API
    - Introduction (Real examples)

2. Creating Custom Layers(Brief Introduction)
    - Guides to writing your own Layers

3. The Base Layers Class (With exmaples)
    - Layer class
    - Weights property
    - trainable_weights property
    - non_trainable_weights property
    - trainable property
    - get_weights method
    - set_weights method
    - get_config method
    - add_loss method
    - add_metric method
    - losses property
    - metrics property
    - dynamic property

4. Layer Activation
    - relu function
    - sigmoid function
    - softmax function
    - softplus function
    - softsign function
    - tanh function
    - selu function
    - elu function
    - exponential function
