TEKLRN

DOCKER LEVEL 43

1. Use the AUFS storage driver
   - Prerequisites

2. Configure Docker with the aufs storage driver

3. How the aufs storage driver works
   - Example: Image and container on-disk constructs

4. How container reads and writes work with aufs
   - Reading files
   - Modifying files or directories

5. AUFS and Docker performance

6. Performance best practices

7. Use the BTRFS storage driver
   - Prerequisites

8. Configure Docker to use the btrfs storage driver

9. Manage a Btrfs volume

10. How the btrfs storage driver works
    - Image and container layers on-disk

11. How container reads and writes work with btrfs

12. Btrfs and Docker performance
