TEKLRN

KUBERNETES LEVEL 25

1. Persistent Volumes
   - Configuration
   - Introduction

2. Lifecycle of a volume and claim
   - Provisioning
   - Static
   - Dynamic
   - Binding
   - Using
   - Storage Object in Use Protection
   - Reclaiming
   - Retain
   - Delete
   - Recycle

3. Expanding Persistent Volumes Claims
   - CSI Volume expansion
   - Resizing a volume containing a file system
   - Resizing an in-use PersistentVolumeClaim
   - Recovering from Failure when Expanding Volumes

4. Types of Persistent Volumes

5. Persistent Volumes
   - Capacity
   - Volume Mode
   - Access Modes
   - Class
   - Reclaim Policy
   - Mount Options
   - Node Affinity
   - Phase

6. PersistentVolumeClaims
   - Access Modes
   - Volume Modes
   - Resources
   - Selector
   - Class

7. Claims As Volumes

8. Raw Block Volume Support
   - PersistentVolume using a Raw Block Volume
   - PersistentVolume using a Raw Block Volume
   - Pod specification adding Raw Block Device path in container

9. Binding Block Volumes

10. Volume Snapshot and Restore Volume from Snapshot Support
    - Create a PersistentVolumeClaim from a Volume Snapshot

11. Volume Cloning
    - Create PersistentVolumeClaim from an existing PVC

12. Writing Portable Configuration
