- Use the OverlayFS storage driver

- Configure Docker with the overlay or overlay2 storage driver

- How the overlay2 driver works

- Image and container layers on-disk

- How the overlay driver works

- How container reads and writes work with overlay or overlay2

- OverlayFS and Docker Performance

- Performance best practices

- Limitations on OverlayFS compatibility

- Use the ZFS storage driver

- Configure Docker with the zfs storage driver

- Manage zfs

- Increase capacity on a running device

- Limit a container's writable storage quota

- How the zfs storage driver works

- How container reads and writes work with zfs

- ZFS and Docker performance
