TEKLRN

C# LEVEL 22

1. Functional vs. Procedural Programming (LINQ to XML)

2. LINQ to XML Classes Overview

3. LINQ to XML Classes

4. XElement Class Overview

5. Constructing XML Trees

6. Serializing XML Trees

7. Retrieving XML Data via Axis Methods

8. Querying XML Trees

9. Modifying XML Trees

10. XAttribute Class Overview
    - Overview

11. The XAttribute Constructor

12. Creating an Element with an Attribute

13. Functional Construction of Attributes

14. Attributes Are Not Nodes

15. XDocument Class Overview
    - Overview of the XDocument class
    - Components of XDocument

16. Using XElement without XDocument

17. Using XDocument

18. How to build LINQ to XML examples
    - Example
